History

#1 - May 13, 2016 09:18 PM - Pasquale Pagano

- Tracker changed from Support to Task

- Priority changed from Normal to High

According to my knowledge each instance has the following characteristics:

- 4 GB Ram
- 40 GB Disk
- 2 CPUs

The instances will be used for development and then if Couchbase will be adopted in production, similar instances should be created. Creating them via provisioning could be the right choice.
