

D4Science Infrastructure - Task #4534

Expand GN resources RAM in dev

Jun 29, 2016 05:49 PM - Fabio Sinibaldi

Status:	Closed	Start date:	Jun 29, 2016
Priority:	High	Due date:	
Assignee:	_InfraScience Systems Engineer	% Done:	100%
Category:	Data Management	Estimated time:	0.00 hour
Target version:	Development Environment Enhancements		
Infrastructure:	Development		
Description We need to test GeoNetwork capabilities in updates, that crashed 3 times with 3GB of RAM (tomcat option is -Xmx3072M). The node involved is geoserver-dev2.d4science-ii.research-infrastructures.eu which at the moment shows 23M of free RAM. Since we need to understand how much RAM it needs, can you add more RAM to the machine so we can edit the tomcat startup configuration?

- Status changed from New to In Progress
- % Done changed from 0 to 80

I added 2GB of ram to the configuration. Let me know when I can reboot it.

#2 - Jun 30, 2016 02:01 PM - Fabio Sinibaldi

Reboot it whenever you're ready.

#3 - Jun 30, 2016 04:00 PM - Andrea Dell'Amico

- Status changed from In Progress to Feedback
- % Done changed from 80 to 100

VM rebooted
