

D4Science Infrastructure - Task #4852

Split the ganglia and nagios servers

Aug 08, 2016 11:27 AM - Andrea Dell'Amico

Status:	Rejected	Start date:	Aug 08, 2016
Priority:	Urgent	Due date:	
Assignee:	_InfraScience Systems Engineer	% Done:	100%
Category:	System Application	Estimated time:	0.00 hour
Target version:	UnSprintable		
Infrastructure:	Development, Pre-Production, Production		
Description			
The monitoring load is skyrocketing as we are adding more nagios checks and more services to ganglia.			
Create two new VMs, one for ganglia and one for nagios.			
A third VM will maintain the actual monitoring.research-infrastructures.eu's IP and will act as reverse proxy for the clients and NAT default gateway for the two new VMs.			

History

#1 - Aug 08, 2016 11:51 AM - Andrea Dell'Amico

In the meantime I added 2 GB of RAM and moved the ganglia data to a SAN exported volume.

#2 - Mar 05, 2018 04:40 PM - Andrea Dell'Amico

- Status changed from New to Rejected

- % Done changed from 0 to 100

ganglia is dead, working on prometheus.
