

D4Science Infrastructure - Support #4855

TabMan; I cannot remove a merged column, but I can after I clone

Aug 08, 2016 03:58 PM - Anton Ellenbroek

Status:	Rejected	Start date:	Aug 08, 2016
Priority:	Normal	Due date:	
Assignee:	Lucio Lelii	% Done:	100%
Category:		Estimated time:	0.00 hour
Infrastructure:	Development		
Description			
I merge two columns; year and month with " - " as separator; I cannot remove the resulting column. If I clone the Tabular resource, I can remove the column.

I just tried the same operation with a test dataset and it worked.
Did you set the dataset as final after the merge operation ?

#2 - Aug 29, 2016 05:02 PM - Lucio Lelii

- Status changed from New to In Progress

#3 - Oct 07, 2016 04:41 PM - Pasquale Pagano

- Status changed from In Progress to Rejected

If the dataset is final the behaviour is the expected one, if not please reopen the ticket and report additional information.

#4 - Oct 07, 2016 05:02 PM - Anton Ellenbroek

Please make the status of a Tabular resource more explicit, and improve UI by (either/or):

- Disable actions that will result in nothing, with a mouse-over why it is disabled;
- Display a message to user that this action is not allowed on a final resource
