

D4Science Infrastructure - Task #5584

Please upgrade resource-registry

Oct 27, 2016 10:42 AM - Luca Frosini

Status:	Closed	Start date:	Oct 27, 2016
Priority:	Normal	Due date:	
Assignee:	_InfraScience Systems Engineer	% Done:	100%
Category:	Application	Estimated time:	0.00 hour
Target version:	UnSprintable		
Infrastructure:	Development		
Description			
The new version is: <i>resource-registry-1.2.0-20161027.082258-5.war</i>			
I already upgraded the version on ansible script (<i>library/roles/smartgears/resource_registry/defaults/main.yml</i>) and then I tried to install it.			
Unfortunately something is not working properly: On the target host (<i>resourceregistry1-d-d4s</i>) the war is present on home folder but the service which is still deployed is an old version:			
<pre>cat tomcat/webapps/resource-registry/META-INF/maven/org.gcube.information-system/resource-registry/pom.properties #Generated by Apache Maven #Thu Sep 29 17:13:31 CEST 2016 version=1.1.0-SNAPSHOT groupId=org.gcube.information-system artifactId=resource-registry</pre>			

History

#1 - Oct 27, 2016 10:42 AM - Luca Frosini

- Description updated

#2 - Oct 27, 2016 10:43 AM - Luca Frosini

- Description updated

#3 - Oct 27, 2016 12:56 PM - Andrea Dell'Amico

- Status changed from In Progress to Feedback

When upgrading you need to pass an additional variable to the play, so that the old webapp will be removed:

```
-e 'resource_registry_upgrade=True'
```

You also need to specify your token, as requested by smartgears 2:

```
-e 'gcube_admin_token=<TOKEN>'
```

#4 - Oct 28, 2016 11:51 AM - Luca Frosini

- Status changed from Feedback to Closed

- % Done changed from 30 to 100

Thanks for yr support
