

D4Science Infrastructure - Incident #5654

HomeLibrary webapp: PermGen OutOfMemory

Nov 04, 2016 06:25 PM - Roberto Cirillo

Status:	Closed	Start date:	Nov 04, 2016
Priority:	High	Due date:	
Assignee:	_InfraScience Systems Engineer	% Done:	100%
Category:	Application	Estimated time:	0.00 hour
Target version:	UnSprintable		
Infrastructure:	Production		

Description

It's need to increase the PermGen space and the RAM on HomeLibrary webapp:

`node76.p.d4science.research-infrastructures.eu`

Since release 4.1 the homelibrary webapp run on smartgears and I think it needs also more RAM. Is it possible to increase the RAM to 4 GB and the PermGen space?

History

#1 - Nov 04, 2016 06:33 PM - Andrea Dell'Amico

- Status changed from New to In Progress
- % Done changed from 0 to 80

Reconfigured to give it 6GB of ram. A reboot is required

#2 - Nov 04, 2016 07:41 PM - Andrea Dell'Amico

- Status changed from In Progress to Closed
- % Done changed from 80 to 100

The VM has been restarted. There was a problem at boot time because the main dns server inside /etc/resolv.conf was wrong, and a mount point did not exist anymore.

Both problems have been fixed.
