- % Done changed from 0 to 100

support-social.isti.cnr.it now is running on srv1-isti.isti.cnr.it xen dom0, svn data has been deleted on this server.

The old server newissue.research-infrastructures is still running with apache and postgress down, the support-social.isti.cnr.it IP has been deleted from this host.
The host newissue probably can be shut down (see #172)
