## Description

When a user goes to the "Explore VREs" panel he / she is provided with a list of VREs that are annotated with two buttons:

- the Info;
- a button having several labels: Access Granted, Request Access, Private, Enter this VRE;

The semantic of this second button might be misleading, e.g.

- Private is shown in the case of a "private" VRE even if the user has access to it;
  - When the user is logged in and he/she has access to the VRE he/she should see "Enter (the VRE)";
- "Access Granted" and "Enter this VRE" are diverse without any real motivation;
  - I suggest to use always a green button with "Enter (the VRE)" to annotate the VREs the user has access to independently on whether they are (a) "public VREs", (b) "private VREs" the user is member of, (c) "Authorization-based VREs" the user is member of;

## History

**#1 - Jan 02, 2017 02:08 PM - Massimiliano Assante**

*- Status changed from New to In Progress*

*- Priority changed from Normal to Urgent*

**#2 - Jan 02, 2017 04:07 PM - Massimiliano Assante**

*- Status changed from In Progress to Closed*

*- % Done changed from 0 to 100*

the requested changes have been implemented, tested and put in production.
