

D4Science Infrastructure - Task #6676

Reconcile VRE Folder roles with VRE Manager Roles

Jan 26, 2017 07:09 PM - Leonardo Candela

Status:	Closed	Start date:	Jan 26, 2017
Priority:	High	Due date:	
Assignee:	Leonardo Candela	% Done:	100%
Category:	Application	Estimated time:	0.00 hour
Target version:	SocialNetworkingImprovements		
Infrastructure:	Production		
Description <p>I see the need to keep the roles associated to each VRE folder with the VRE Managers.</p> <p>In particular, each VRE folder is currently created with</p> <ul style="list-style-type: none">• Admin: who "was" the VRE Manager at VRE Creation time;• WRITE_OWNER: each member of a VRE; <p>This implies that if someone becomes VRE Manager during the VRE lifetime he\she has limited rights on the VRE folder, e.g. he\she is not allowed to move the objects created by others.</p> <p>I would suggest that the assignment of VRE Manager roles result in making the assignee a VRE Folder admin too. Is this feasible \ reasonable? Is the user management called to fire the "event"?</p>

Wha you suggest (the assignment of VRE Manager roles result in making the assignee a VRE Folder admin too) is what we had until the switch to the revamped portal.

The new users management portlet does not do it anymore, and it is correct it doesn't. We have an hook contacting the HL incase of user adding/removal from a VRE, the same hook should also do this job of keeping in sync the VRE Manager with the VRE Folder managers. I think I planned to do it in the past but then I forgot ... I'm opening now a ticket to track this feature.

- Status changed from Closed to Feedback

- Assignee changed from Massimiliano Assante to Leonardo Candela

Are we really sure we want to give VRE Managers the roles of Administrator on the Related VRE Folder, I mean this feature is possible for the VRE Folder owner by using the Edit Administrator option. Although a little buggy at the moment, see <https://support.d4science.org/issues/6988>

When creating a VRE the VRE-Designer is set as VRE Folder owner, i wonder that there could be cases where one would not want VRE Managers to be VRE Folder administrators. So to delegate VRE Managers only the users management part and not the workspace part. What do you think?

#7 - Feb 08, 2017 06:20 PM - Leonardo Candela

- % Done changed from 100 to 50

Until we keep the current VRE development approach (i.e. the VRE designer is not who was planned to be) I would go for the discussed solution.

I do not see any harmful issue, if I'm giving someone the role to be VRE manager than I do expect she/he is also the manager of the associated workspace.

Expecting that who designed the VRE will continue to take care of VRE "pieces" is error prone and misleading.

If you want to decouple the role of VRE Manager from that of VRE folder manager than do this in the proper way, i.e. by having these roles (and supporting them) rather than delegating this logic to the workspace.

#8 - Feb 20, 2017 12:32 PM - Pasquale Pagano

- *Tracker changed from Support to Task*
- *Target version changed from UnSprintable to SocialNetworkingImprovements*

Leonardo's request is correct and the activity has been planned. Please @massimiliano.assante@isti.cnr.it confirm that it is under implementation and close this ticket.

#9 - Feb 23, 2017 03:33 PM - Massimiliano Assante

- *Status changed from Feedback to In Progress*

Leonardo's request is being implemented in - Feature #6680

#10 - Apr 11, 2019 05:57 PM - Leonardo Candela

- *Status changed from In Progress to Closed*
- *% Done changed from 50 to 100*

The feature is there.
