D4Science Infrastructure - Task #6748

Prepare a clone of broker1-dev-dnet.d4science.org

Jan 31, 2017 03:36 PM - Michele Artini

Status:	Closed		**Start date:**	Jan 31, 2017
Priority:	Normal		**Due date:**	
Assignee:	Andrea Dell'Amico		**% Done:**	100%
Category:	Other		**Estimated time:**	0.00 hour
Target version:	UnSprintable			
Infrastructure:	Development			

Description

Can you prepare a clone of broker1-dev-dnet.d4science.org (see #4414)?

It is necessary to preserve the following components:

1. Tomcat and its webapps
2. ElasticSearch and its data
3. RabbitMQ

The name of this clone should be **broker1-demo-dnet.d4science.org**.

The access to 8080 should be blocked by default,
but the following url(s) must be accessible:

```
http://broker1-demo-dnet.d4science.org:8080/lbs/openaire/**
```

History

#1 - Feb 01, 2017 12:44 PM - Andrea Dell'Amico

- Tracker changed from Support to Task

- Status changed from New to In Progress

IP is going to be 146.48.122.243

#2 - Feb 01, 2017 04:29 PM - Andrea Dell'Amico

- Status changed from In Progress to Feedback

- % Done changed from 0 to 100

The VM is ready, you can access it the same way as broker1-dev-dnet.d4science.org.

From the outside (and from the inside too) the URL will be https://broker1-demo-dnet.d4science.org/lbs/openaire

The authentication and the IP based ACLs need to be tested. The authentication should be active only if the requests come from outside our networks.
