Target version:	DataMiner Interface			
Infrastructure:	Production			

Description
The DataMiner interface should URL-encode the InputData parameters when the Show button is pressed. Perhaps this also influences the behaviour of the Resubmit button.

Portlet uses wps-client-library to communicate with the server, so, this problem is inherent only for the Equivalent Http Request created for the user. I added the encoding for the values of parameters. @gianpaolo.coro@isti.cnr.it, what do you think about it? Can we release it in GCube 4.3?
