

## D4Science Infrastructure - Incident #7571

### DataMiner portlet caches the DataMiner server

Mar 17, 2017 04:35 PM - Gianpaolo Coro

<b>Status:</b>	Closed	<b>Start date:</b>	Mar 17, 2017
<b>Priority:</b>	Urgent	<b>Due date:</b>	
<b>Assignee:</b>	Giancarlo Panichi	<b>% Done:</b>	100%
<b>Category:</b>	High-Throughput-Computing	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	Data Processing		
<b>Infrastructure:</b>	Production		
<b>Description</b>			
<p>When a user comes to the portal, until (s)he logs out (s)he will always use the same DataMiner service. Multiple processes, run one after the other, will always go to the same DM, like the proxy was ignored. The proxy is completely bypassed after the first GetCapabilities and the DescribeProcess are called. I guess there is something cached at the Portlet side.</p>			

#### History

##### #1 - Mar 17, 2017 06:22 PM - Giancarlo Panichi

- Status changed from New to In Progress

##### #2 - Mar 17, 2017 07:40 PM - Giancarlo Panichi

WPS client-library keeps in the user session the url of proxy that DataMiner has recovered from the Service Endpoint. I need further investigation to find out if it is keeping server assigned for execution too. I open a task for this.
