D4Science Infrastructure - Task #7810

update ansible scripts for release 4.4.0

Mar 27, 2017 10:41 AM - Lucio Lelii

Status:	Closed	**Start date:**	Mar 27, 2017
Priority:	Normal	**Due date:**	
Assignee:	_InfraScience Systems Engineer	**% Done:**	100%
Category:	Other	**Estimated time:**	0.00 hour
Target version:	UnSprintable		
Infrastructure:	Development, Pre-Production, Production		

Description

in the new distribution (org.gcube.distribution.smartgears-distribution.2-1-2) released in 4.4.0 there is the possibility to define only VO scopes accepting request also from children VREs.
To enable this option you must add the following tag to the container.xml file:

true

Specifying as start tokens only the VO tokens and eventually the infrastructure token.

Also the clean-container-state have been re-introduced: it automatically deletes the local state, removes all the related resources from the IS and saves all the tokens (also the ones dinamically added) in a file on the GHN_HOME dir. the command to execute this script is:

GHN_HOME/scripts/clean-container-state {token-file-name}

History

#1 - Mar 27, 2017 05:30 PM - Andrea Dell'Amico

- Status changed from New to In Progress

- % Done changed from 0 to 20

The container.xml template and the related variables have been modified. Now I need a released distribution to test all the workflow.
