Description

RStudio facility should be added to the AGINFRA+ VRE

For the time being the community has not been able to pose any real requirement on the computing capacity this instance is expected to support, it is for testing purposes only.

I would suggest to exploit the existing instances (dunno how many).

Once deployed I would like to know the characteristics of the cluster thus to announce them by the VRE.

History

- Status changed from In Progress to Feedback

- % Done changed from 0 to 100

For testing purpose I've added the following instance:

```
ip-90-147-167-3.ct1.garrservices.it
```

with the following characteristics:

- 16 CPU
- 32 GB RAM

Please, tell me if it is ok for the moment

Thanks Roberto, it is OK for the time being. I added the portlet and I confirm it is working.
