Description

To speed up the jackrabbit migration tests, we need a copy of the machine reported https://support.d4science.org/issues/7877 (as much as powerful as it is; please check the inserted values in this ticket are correct)

Moreover, a local postgresql is required (instead of a remote one)

Please give ssh access to me, @massimiliano.assante@isti.cnr.it and @valentina.marioli@isti.cnr.it

workspace-repository-prod1.d4science.org running
There is a copy of /data/newJackrabbit/jackrabbit from workspace-repository-prod.d4science.org
and a local postgresql server with an empty workspace-db database

I had to temporarily disable the http -> https redirection because we do not have a valid certificate yet. I'll add it again when the certificate will be emitted.

@tommaso.piccioli@isti.cnr.it unfortunately the /dev/xvda2 of only 10G on workspace-repository-prod1.d4science.org did not allow the complete migration we would need at least the double of disk space (20G)

#5 - May 11, 2017 11:49 AM - Tommaso Piccioli

/home/gcube/tomcat/jackrabbit_migrated is now a link to /data/newjackrabbit/jackrabbit_migrated, 70 GB free
