

D4Science Infrastructure - Task #8622

Install a newer version of pgpool2 to fix the shutdown problem when the network goes away

May 16, 2017 02:11 PM - Andrea Dell'Amico

Status:	Closed	Start date:	May 16, 2017
Priority:	Urgent	Due date:	
Assignee:	_InfraScience Systems Engineer	% Done:	100%
Category:	System Application	Estimated time:	0.00 hour
Target version:	UnSprintable		
Infrastructure:	Development, Pre-Production, Production		
Description			
See #8617 , we don't want that a network failure causes a shutdown of the pgpool server

- % Done changed from 0 to 100

pgpool2 3.6.2 is running on both the dev instances (note: different versions cannot be run together). No configuration changes were needed and the admin commands didn't change.

I also tested a recovery.

@lucio.lelii@isti.cnr.it can you verify that the authorization service is working correctly? I see connections to postgres so I guess it's OK, but better have a check.

It is working.
