

D4Science Infrastructure - Task #8679

New Python Packages Installation on DataMiners

May 18, 2017 12:52 PM - Paolo Scarponi

Status:	Closed	Start date:	May 18, 2017
Priority:	Normal	Due date:	
Assignee:	_InfraScience Systems Engineer	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	Algorithms Integration		
Infrastructure:	Production		
Description			
The following Python packages should be installed on all the Data Miners in order to enable the integration of a new algorithm:			
math http://www.lfd.uci.edu/~gohlke/pythonlibs/#scipy			
numpy http://www.lfd.uci.edu/~gohlke/pythonlibs/#numpy			
random http://www.lfd.uci.edu/~gohlke/pythonlibs/#scipy			

History

#1 - May 18, 2017 05:22 PM - Andrea Dell'Amico

Do you know the exact packages name? scipy and numpy are already installed on all dataminers, but there are no packages called exactly math nor random

#2 - May 18, 2017 05:34 PM - Paolo Scarponi

I just noted that the download locations provided by the user who required the installation of such packages do not actually match the package names themselves. I will ask him to give us more precise information.

#3 - May 19, 2017 11:17 AM - Paolo Scarponi

- Status changed from New to Closed

- % Done changed from 0 to 100

The user confirmed that math and random are two specific functions inside the "scipy" package. This means that everything is already OK, I am going to close the ticket.
