The ssl certificates are in place. To enable ssl the needed steps are:

Set

```
http_ssl_enabled
```

to *True*

in the playbook file d4science_gcube/group_vars/mediawiki/all.yml

Run the playbook, limited to the nginx configuration to speed up the operations. From inside d4science_gcube:

```
./run.sh mediawiki.yml -i inventory/hosts --tags=nginx
```

- Status changed from In Progress to Closed

- % Done changed from 70 to 100   *2/2*

https is working correctly. The http accesses are redirected over https.
