

D4Science Infrastructure - Task #8891

Setup dev.datasciencepro.eu to work on D4Science preprod infrastructure

Jun 09, 2017 02:41 PM - Massimiliano Assante

Status:	Closed	Start date:	Jun 09, 2017
Priority:	Urgent	Due date:	Jun 09, 2017
Assignee:	Massimiliano Assante	% Done:	100%
Category:	Other	Estimated time:	0.00 hour
Target version:	EDISON Migration outside CNR		
Infrastructure:	Pre-Production		
Description The dev.datasciencepro.eu is the portal EDISON Project is going to use for development of their applications. It should run in D4Science preprod (preVRE) so that they can expect a relative stable environment.			
Subtasks: Task # 8892: Authorize dev.datasciencepro.eu (194.149.136.225) on /gcube Closed			
Related issues: Blocked by D4Science Infrastructure - Task #8893: Please Install Java 8 Oracl... Closed Jun 09, 2017			

History

#1 - Jun 09, 2017 02:46 PM - Massimiliano Assante

- Tracker changed from Support to Task

#2 - Jun 09, 2017 02:59 PM - Massimiliano Assante

- Blocked by Task #8893: Please Install Java 8 Oracle on datasciencepro instances to added

#3 - Jun 09, 2017 03:00 PM - Massimiliano Assante

- Status changed from In Progress to Paused

Paused until Task [#8893](#): Please Install Java 8 Oracle on datasciencepro instances

#4 - Jun 14, 2017 11:22 AM - Massimiliano Assante

- Status changed from Paused to In Progress

#5 - Jun 19, 2017 04:59 PM - Massimiliano Assante

@boro.jakimovski@finki.ukim.mk I did work today via ssh on the edison dev portal, i could also startup it (via startup.sh as it asks for password for the .startcontainer script) but i am not able to contact it via http on 9090 nor via https.

Any idea?

I tried <https://dev.datasciencepro.eu/> and <http://dev.datasciencepro.eu:9090/>

#6 - Jun 23, 2017 03:05 PM - Massimiliano Assante

- Status changed from In Progress to Closed

I could connect to dev.datasciencepro today and finished the job. I created and set up a development VRE (with gCube portlets) for you that works on our preproduction <https://dev.datasciencepro.eu/group/edison/explore>

I also removed the Sites pointing to production from this instance.

#7 - Jun 23, 2017 03:17 PM - Massimiliano Assante

and I added @pierpaolo.petriccione@eng.it and @boro.jakimovski@finki.ukim.mk ad VRE Managers

#8 - Jun 28, 2017 12:43 PM - Massimiliano Assante

Since the migration is complete (on <https://dev.datasciencepro.eu/>), we are going to dismiss the VM hosting the edison portal on d4science

infrastructure (edison.d4science.org alias dev3.d4science.org) soon [#9093](#)
