

D4Science Infrastructure - Task #8978

Enable DBEndpoint service in the (preproduction) preECO VRE

Jun 19, 2017 05:53 PM - Denis Pyriochos

Status:	Closed	Start date:	Jun 19, 2017
Priority:	High	Due date:	
Assignee:	Denis Pyriochos	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	preECO VRE		
Infrastructure:	Pre-Production		
Description			
Wanted DB Endpoint named SimulFishGrowthData, as the one available at preVRE and NextNext			

History

#1 - Jun 19, 2017 05:57 PM - Massimiliano Assante

- Tracker changed from Support to Task
- Status changed from New to In Progress

#2 - Jun 19, 2017 06:04 PM - Massimiliano Assante

- Assignee changed from Massimiliano Assante to Roberto Cirillo

#3 - Jun 19, 2017 06:05 PM - Roberto Cirillo

- Status changed from In Progress to Closed
- % Done changed from 0 to 100

#4 - Jun 19, 2017 09:15 PM - Denis Pyriochos

@roberto.cirillo@isti.cnr.it Sorry, I misread the error message. The DB endpoint should be named SimulFishGrowth (no Data at the end).

- Status changed from Closed to In Progress

#6 - Jun 22, 2017 10:17 AM - Roberto Cirillo

@denispyr@i2s.gr please, could you add your error log or some exception when you open a ticket, if it's possible? Without this information I cannot understand fast what you really need and what is your problem.
For example in [#8982](#) you ask me to add the ServiceEndpoint resource in the ticket description but after two days I had understood that you need a Running Instance resource and not a service Endpoint resource as you said. In order to avoid this situation I kindly ask you to share more details when you open a ticket.
In this case, could you add the error log or an exception? If you have an error or an exception as I think, why didn't you add it yet?
BTW the service Endpoint named SimulFishGrowth has been added to preEco VRE two days ago.

- Status changed from Feedback to Closed

Hey @roberto.cirillo@isti.cnr.it. Regarding this ticket, I asked to add preECO to an existing database endpoint and then I realized I misspelled the name. Fortunately you edited the correct one.
Regarding [#8982](#) I said that it the endpoint points to a servlet and I also gave a similar older request. I did this because I didn't want to mess with the endpoints terminology. Sorry if I misguided you.
It seems all needed endpoint are in place so thanks :)
