Description

Hello Valentina,

I am facing some issue with SAI save option.The detail of the published algorithm is given below

The user: Debhsish Bhakta

Algorithm name: UserDefineShapefile

Link to Dataminer
https://bluebridge.d4science.org/group/rprototypinglab/data-miner?OperatorId=org.gcube.dataanalysis.wps.statisticalmanager.synchserver.mappedclasses.transducerers.USERDEFINESHAPEFILE

jar: http://data.d4science.org/NkJIQkh4aFd5dzBNdEhrTUQyQlZjb1NhN2dhUkswVU1HbWJQNStlS0N6Yz0

Actually, I am unable to save the edited script and when I try to save the script an error window (attached) is popup with message "LockException: Node locked."

Do I need to configure something to enable the save changes in SAI?

Regards
Debhasish

I'm wondering whether @g.panichi@isti.cnr.it can help here.

#2 - Jul 14, 2017 04:43 PM - Valentina Marioli

- Status changed from New to In Progress

#3 - Jul 14, 2017 05:56 PM - Valentina Marioli

- Status changed from In Progress to Feedback

- % Done changed from 0 to 100

The lock has been removed.
Please @debhasish.bhakta@grida.no , try again to edit and save the script.
Thanks.

- File error2.png added

Hello Valentina,
Thank you ! Now I am able to save and repackage the script.

But still I have some doubt because save changes in the script is not reflecting in the dataminer algorithm.

Link to Dataminer
https://bluebridge.d4science.org/group/rprototypinglab/data-miner?OperatorId=org.gcube.dataanalysis.wps.statisticalmanager.synchserver.mappedclasses.transducerers.USERDEFINESHAPEFILE

Even I have tried with removing all the business logic from the script with simple code to track the changes of script in the Dataminer but still it through a same error before and after (attached).

Could you conform the script and the dataminer is linked (or may be you have some better explanation)

Regards
Debhasish

After saving your script do you perform any "repackaging" operation? The reason why I am asking such question is that the repackaging is the action that actually reflects your script changes into the dataminer algorithm. Please refer to the following wiki:

https://wiki.gcube-system.org/gcube/Statistical_Algorithms_Importer

- Status changed from Feedback to Closed

I also proceed to close the ticket because the issue it was opened for is solved
