

D4Science Infrastructure - Incident #9510

last backup of the table metadata.metadata of Sardara database

Aug 10, 2017 04:12 PM - Paul Taconet

<b>Status:</b>	Closed	<b>Start date:</b>	Aug 10, 2017
<b>Priority:</b>	Immediate	<b>Due date:</b>	
<b>Assignee:</b>	_InfraScience Systems Engineer	<b>% Done:</b>	100%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	UnSprintable		
<b>Infrastructure:</b>	Production		
<b>Description</b>			
I have made a wrong 'UPDATE' query on the Sardara database and I have lost some data.			
Would it be possible to get back ASAP:			
<ul style="list-style-type: none"><li>the last backup of the table metadata.metadata of the database (only this table is necessary since the wrong UPDATE query only affects this table),</li><li>the complete list of 'UPDATE' queries that were made since this last backup?</li></ul>			
Thanks, Paul			

History

#1 - Aug 11, 2017 11:40 AM - Paul Taconet

- Status changed from New to Closed

I have manually fixed the problem with the help of my colleagues  
I therefore close the issue.

OK, I was extracting the August 10th early backup right now.

We have (almost) daily backups of the database, but we do not log the queries
