

D4Science Infrastructure - Task #9532

workspace: lots of rows into the datastore_datastore postgresql tables

Aug 23, 2017 01:28 PM - Andrea Dell'Amico

Status:	Closed	Start date:	Aug 23, 2017
Priority:	Normal	Due date:	
Assignee:	Costantino Perciante	% Done:	100%
Category:	System Application	Estimated time:	0.00 hour
Target version:	Production Jackrabbit Migration from Derby to PostgreSQL		
Infrastructure:	Production		

Description

I was told that the datastore was not used, but I see that the datastore table lists thousand of rows:

```
# select count(*) from datastore_datastore;
count
-----
6937
(1 row)
```

Are they the result of the migration from the old setup or there's something that still writes there?

History

#1 - Oct 18, 2017 09:52 AM - Costantino Perciante

- Status changed from New to In Progress
- Assignee changed from Valentina Marioli to Costantino Perciante
- % Done changed from 0 to 100

Yes Andrea, it was result of the migration.

I guess I can close this ticket
