

D4Science Infrastructure - Task #9720

Provide a java script for transferring scopes from a resource to another

Sep 20, 2017 11:17 AM - Roberto Cirillo

Status:	Closed	Start date:	Sep 20, 2017
Priority:	Low	Due date:	
Assignee:	Roberto Cirillo	% Done:	100%
Category:	Data Management	Estimated time:	0.00 hour
Target version:	UnSprintable		
Infrastructure:	Development, Pre-Production, Production		

Description

Often it's needed to add a new resource on the infrastructure that has the same scopes of another resource. In this cases, if there are several scopes to add, it's better to do it via script and not by hand. The script should be done invoking the resource-manager service and not directly the registry-publisher and it could be done implementing a retry mechanism if the adding is not performed correctly.

History

#1 - Apr 18, 2018 04:17 PM - Roberto Cirillo

- Status changed from New to Closed

This script has been implemented as Java application but it invokes the registry service instead of resource-manager service.
