

D4Science Infrastructure - Task #9850

dm-pool-manager: Provide new instruction for ansible role

Sep 28, 2017 12:25 PM - Roberto Cirillo

Status:	Closed	Start date:	Sep 28, 2017
Priority:	Urgent	Due date:	
Assignee:	Nunzio Andrea Galante	% Done:	100%
Category:	Application	Estimated time:	0.00 hour
Target version:	UnSprintable		
Infrastructure:	Pre-Production, Production		
Description In order to deploy the new version of dm-pool-manager service in preproduction environment, it's needed to update the ansible role if the service configuration is changed. If the service configuration is the same as the last version, you can close this ticket.

History

#1 - Sep 28, 2017 12:26 PM - Roberto Cirillo

- Blocks Upgrade #9824: /gcube/preprod upgrade to gCube 4.7.0 added

#2 - Sep 28, 2017 07:23 PM - Nunzio Andrea Galante

The configuration remains the same, apart two aspects:

- The configuration file has changed and actually is:

#YML node file

SVN_REPO = <https://svn.d4science.research-infrastructures.eu/gcube/trunk/data-analysis/RConfiguration/RPackagesManagement/>

svn.repository = <https://svn.d4science.research-infrastructures.eu/gcube>

svn.algo.main.repo = /trunk/data-analysis/DataMinerConfiguration/algorithms

#STAGE

STAGE_GHOST = dataminer-ghost-d.dev.d4science.org

svn.stage.algorithms-list = /trunk/data-analysis/DataMinerConfiguration/algorithms/dev/algorithms

svn.stage.deps-linux-compiled = /trunk/data-analysis/RConfiguration/RPackagesManagement/r_deb_pkgs.txt

svn.stage.deps-pre-installed = /trunk/data-analysis/RConfiguration/RPackagesManagement/r_deb_pkgs.txt

svn.stage.deps-r-blackbox = /trunk/data-analysis/RConfiguration/RPackagesManagement/r_cran_pkgs.txt

svn.stage.deps-r = /trunk/data-analysis/RConfiguration/RPackagesManagement/r_cran_pkgs.txt

svn.stage.deps-java =

svn.stage.deps-knime-workflow =

svn.stage.deps-octave =

svn.stage.deps-python =

svn.stage.deps-windows-compiled =*

#PROD

svn.prod.algorithms-list = /trunk/data-analysis/DataMinerConfiguration/algorithms/prod/algorithms

- The web.xml file containing the parameter related to the environmnet in which the service works, has not to be touched anymore cause such information is extracted directly from the configuration file.

The version to consider is the dataminer-pool-manager.2.1.0-4.7.0-154360

#3 - Sep 29, 2017 11:32 AM - Roberto Cirillo

- Status changed from New to In Progress

- Assignee changed from Nunzio Andrea Galante to Roberto Cirillo

#4 - Sep 29, 2017 12:27 PM - Roberto Cirillo

- Status changed from In Progress to Feedback

- % Done changed from 0 to 100

The new service has been upgraded in preproduction environment with the new settings. Please, let me know if it works well.

#5 - Sep 29, 2017 12:28 PM - Roberto Cirillo

- Assignee changed from Roberto Cirillo to Nunzio Andrea Galante

#6 - Sep 29, 2017 12:55 PM - Nunzio Andrea Galante

It works fine.
Thanks Roberto.
