Description

I created a process in the stat algo importer of the RprototypingLab using a R script as basis.
The script is working when tested in the RStudio session.
I defined all Inputs and Outputs.
I can "Create" the software, but when I want to "Publish" it, the submission procedure never ends.
I have been waiting for 3 hours but it is still "in progress".
Did I miss something ?

My process is stored in my folder "Covar_Selection_Process".
By the way, can I have access to my own VRE (StatnMap) and publish this process inside ?

- Status changed from New to Closed

Ok after the updates to the algorithm publishing system were done.
Algorithm appears in the list

#2 - Oct 13, 2017 10:55 AM - Nunzio Andrea Galante

It was a decoding problem with a blank space into a SVN link of the configuration file.
Actually is has been solved.
