

D4Science Infrastructure - Task #9941

Please create an ansible playbook to deploy resource-registry-handlers in smartgeras containers

Oct 12, 2017 03:33 PM - Luca Frosini

Status:	Closed	Start date:	Oct 12, 2017
Priority:	Urgent	Due date:	
Assignee:	_InfraScience Systems Engineer	% Done:	100%
Category:	System Application	Estimated time:	0.00 hour
Target version:	Resource Provisioning		
Infrastructure:	Development, Pre-Production, Production		

Description

The maven coordinates to be used in ansible playbook are:

```
<groupId>org.gcube.smartgears.handlers</groupId>
<artifactId>resource-registry-handlers</artifactId>
<version>latest</version>
```

The jar must be deployed in **tomcat/lib** and the container has to be restarted.

History

#1 - Oct 12, 2017 06:33 PM - Andrea Dell'Amico

- Status changed from New to In Progress

Does it need to be installed in every smartgears or only when activated by a variable?

#2 - Oct 16, 2017 07:05 PM - Luca Frosini

Activated by a variable which should be false by default for the moment. Soon it will be switched to true. Finally the library will be part of distribution

#3 - Oct 19, 2017 06:37 PM - Andrea Dell'Amico

- Status changed from In Progress to Closed

- % Done changed from 0 to 100

Done.

#4 - Oct 19, 2017 06:39 PM - Andrea Dell'Amico

Use the variable resource_registry_handlers_install: True when you want to install it.

#5 - Oct 25, 2017 11:53 AM - Luca Frosini

I'll try it asap
